Summary

Python Developer and AI & Automation Engineer with **1 year of hands-on experience** in **Python, Django, Flask, FastAPI, REST APIs and MySQL**, building backend services, **LLM-powered AI agents** and **data automation pipelines**. Skilled in **LangGraph, Prompt Engineering, OCR, PDF data extraction, AWS S3** and **Machine Learning**. B.Tech Computer Science graduate with **9.1 CGPA**.

Experience

Python Developer & AI Automation Engineer Dec 2025 – Present
SFJBS Pvt. Ltd., Bengaluru

- **Developed and maintained Python backend features** using **Django, Flask and FastAPI**.
- **Engineered AI-enabled features** by integrating **LLM APIs, AI agents and LangGraph** with **prompt engineering**, automating manual workflows.
- **Designed and integrated REST APIs** and **SQL-backed services**; debugged and tested code using **Git**.

Python Full Stack Development Trainee Aug 2025 – Dec 2025
Qspiders

- Completed 4-month training in **Python, SQL, HTML, CSS, JavaScript**; built **MySQL** CRUD web apps.

Projects

B2I Intelligence Agent | *Python, MySQL, AWS S3, OCR, Web Scraping* SFJBS Pvt. Ltd.

- **Built an end-to-end document intelligence app** that extracts SPOC contacts (name, designation, email, phone) from **college PDF reports** into **MySQL**.
- **Developed an automated downloader** that scrapes college websites, uploads reports to **AWS S3** and saves links to the database.
- **Implemented OCR** for scanned pages, **confidence scoring** (High / Medium / Low) and **automatic duplicate detection**.
- **Designed a human-in-the-loop review workflow** with validation, **audit logging**, batch import (CLI with dry-run) and **transactional database push with rollback**.

Brain Tumor Detection System | *Python, TensorFlow, OpenCV, Scikit-learn* GitHub

- Built a **deep learning image classifier** to detect brain tumors from **MRI scans** with **OpenCV preprocessing**.

Café Management System | *Python, MySQL, HTML, CSS* GitHub

- Built a **full-stack web app** with real-time order tracking, billing and **role-based dashboards**.

Technical Skills

Programming: Python, SQL, JavaScript, Object-Oriented Programming (OOP), Data Structures
Backend & APIs: Django, **FastAPI**, Flask, **REST API Development**, API Integration, JSON, CRUD
AI & GenAI: LLM Integration, **AI Agents**, **LangGraph**, **Prompt Engineering**, Workflow Automation
Data & Automation: PDF Data Extraction, **OCR**, Web Scraping, Data Validation, Pandas, NumPy
Databases & Cloud: MySQL, SQL Queries, Database Design, Transactions, **AWS S3**
Machine Learning: Scikit-learn, TensorFlow, OpenCV, Image Processing
Frontend & Tools: HTML5, CSS3, JavaScript, React, Git, GitHub, Postman, VS Code

Education

Viswam Engineering College, Madanapalle Nov 2022 – May 2026
Bachelor of Technology in Computer Science & Engineering ***CGPA: 9.1***

S.V. Junior College, Dharmavaram Jul 2020 – Aug 2022
Intermediate (MPC) *CGPA: 8.3*

Z.P. High School, Kanumukkala Jun 2019 – May 2020
Secondary School Certificate *CGPA: 9.8*

Achievements & Certifications

- **NPTEL – Data Analysis & Decision-Making III** (Elite Grade).
- **Python Full Stack Development** – Saraj Innotech & Qspiders; AI, ML & IoT Workshop (HUBTools).
- Coordinated coding contests for the CSE Association; participated in hackathons and problem-solving workshops.
